Wonder. Adventure. And a Lifetime of Imagination.
We all want the best start in life for our children and the things you do together now will set them up for life.

By talking, singing, reading, and playing with your child you are helping them build the emotional and early literacy skills they need for future success and happiness.

Libraries support you on that journey together in lots of ways by providing:

- A safe and trusted space for you and your little one to explore together.
- Access to a wide range of quality books for babies and for the whole family. From advice on weaning, sleep training, or just a great story.
- A way to connect with other parents through Bookbug sessions and other free activities.
- Advice on how sharing books together helps you and your child to bond and helps them to develop vital early literacy and language skills.
- Free Wi-fi and PCs as well as digital support and signposting to other support services in the community.

Every Child a Library Member has made it even easier to join the library. Your child will be offered library membership at key stages from birth to primary school. We will be on hand throughout your child’s reading journey to offer advice and support and provide access to a world of books, learning and fun.
